*Preface*                      *xiii*

*Acknowledgments*      *xvii*

## *Chapter 1*    *What Is zembly?*    *1*

- 1.1 Social Programming    2
- 1.2 zembly's Environment    4
- 1.3 zembly's Audience    6
- 1.4 Publishing and Scaling with zembly    7
- 1.5 Monetizing with zembly    8
- 1.6 Coming to zembly Soon    8
  - Meebo    8
  - OpenSocial    8
  - Scripting Languages    9
  - A Final Thought    9

## *Chapter 2*    *zembly Basics*    *11*

- What You Will Learn    12
- Examples in This Chapter    12
- 2.1 Exploring the Samples    13
  - Using Clone    15
  - Widget Actions    16
  - Tags on zembly    16
  - AmazonProductSearchWidget—Widget Preview    17
  - Embedding AmazonProductSearchWidget    18
  - Sharing Your Widgets with Clearspring    19

- 2.2 About You—Your Home Page 20
  - Your Profile 21
  - People—Adding Contacts 22
- 2.3 Your Keychain and Service Providers 24
- 2.4 Creating Your First Service: LoanPaymentService 25
  - Specifying Parameters in a Service 27
  - Error Handling 29
  - Testing LoanPaymentService 30
  - Capturing Example Return Data 30
  - Saving Drafts 31
  - Using the JavaScript Editor 31
  - Publishing LoanPaymentService 32
  - Calling LoanPaymentService 32
- 2.5 Creating Your First Widget: LoanPaymentWidget 34
  - Uploading an Image 36
  - Including Library Prototype JS 37
  - Building LoanPaymentWidget 38
  - Using CSS for Styling 38
  - Calling LoanPaymentService in Your Widget 39
  - Previewing and Publishing 41
  - Embedding LoanPaymentWidget 42
- 2.6 Drafts, Versions, and Timelines 42
  - Edit History 42
  - Viewing Versions 44
  - Online/Offline Status 44
- 2.7 Putting It All Together—Using the WeatherBug API 45
  - Using Your Keychain 46
  - Building WeatherBugService 47
  - Using E4X and JavaScript 48
  - Calling WeatherBugService 50
  - Building WeatherBugWidget 51

## ***Chapter 3 Building Flickr Widgets 55***

- What You Will Learn 55
- Examples in This Chapter 56

- 3.1 Using Flickr 56
- 3.2 Building a Slide Show Widget 57
  - Looking at the Source 59
  - Using CSS Styles 59
  - Working with JavaScript 61
  - Sharing Your Widget 66
  - Embedding Your Widget in a Web Page 67
- 3.3 Building a Service for Your Flickr Photos 67
  - Getting a Flickr Application Key 68
  - Creating Service FlickrPeopleService 68
  - Using Find & Use to Add JavaScript 69
  - Testing and Publishing 71
- 3.4 Creating a Flickr User Slide Show Widget 71
  - Specifying Widget Parameters When You Embed 72
  - Creating Widget MyFlickrRandomSlideshow 73
  - Reusing JavaScript Code 74

## *Chapter 4 Building Zillow Widgets 79*

- What You Will Learn 79
- Examples in This Chapter 80
- 4.1 Using Zillow 80
- 4.2 Building a Zillow Service 82
  - Obtaining a Zillow API Key 82
  - Zillow Property IDs 82
  - Building a Zillow-based Service with Parameters 83
  - Using E4X and JavaScript 84
- 4.3 Building a Zillow Widget 88
  - Creating RecentSalesWidget 89
  - Embedding RecentSalesWidget 92
- 4.4 Building a Google Maps Mashup 92
  - Exploring Google Maps API 93
  - Designing Widget RecentSalesMashup 94
  - Creating Widget RecentSalesMashup 95

<b>Chapter 5</b>	<b>Facebook Basics</b>	<b>101</b>
	What You Will Learn	101
	Examples in This Chapter	102
	The New Facebook Design	102
<b>5.1</b>	<b>About Facebook</b>	<b>103</b>
	What Is a Facebook Application?	103
	Canvas Page	104
	The Facebook User	105
	Friends	105
	Your Profile	105
	Applications and Application Settings	106
	Profile Boxes	108
	Left-Hand Column	109
	Application Tabs	110
	Application Access	111
	Email and Notices	112
	Story Types and News Feed Templates	112
	Profile Publisher	113
	Application Info Sections	114
<b>5.2</b>	<b>Creating a Facebook Application</b>	<b>114</b>
	Facebook Application Wizard	115
	Core Services and Widgets	120
<b>5.3</b>	<b>Loan Calculator—Your First Facebook Application</b>	<b>121</b>
	Deleting Home and Creating a New Widget	121
	Editing Widget Home (NewWidget)	122
	Uploading Resource Image	123
	Including Library Prototype JS	124
	Previewing and Publishing Widget Home	124
	Configuring Home	124
	Running Your Application in Facebook	125
	Facebook Application Defaults	126
	Enhancing Your Application on Facebook	127
	Making Your Application Accessible	129
<b>5.4</b>	<b>zembly and Facebook—A Closer Look</b>	<b>130</b>
	Exploring the Facebook APIs	131
	Facebook Code Testing Tools	133

- Application Context and Permissions 134
- Controlling the Allow Access Process 136
- 5.5 BuddyPics—Using FBML and FBJS 137**
  - FBML Overview 138
  - The BuddyPics Application 139
  - Adding Content to Your Profile 141
  - Building the BuddyPics Facebook Application 141
  - Creating Dynamic Content with FBML 142
  - BuddyPics Home Widget (FBML) 143
  - Service GetFriendInfo 153
  - Testing a Facebook Service 155
  - Service UpdateProfileBox 157
  - Summary of Differences with FBML Widgets 158
  - The HTML Alternative 160
  - What's Next 160

## *Chapter 6 Facebook Integration 161*

- What You Will Learn 162
- Examples in This Chapter 162
- 6.1 Capital Punishment—A Challenging Facebook Application 162**
  - Cloning the Facebook Application 164
  - The Capital Punishment Home Widget 164
  - Service UpdateProfileBox 181
  - Publishing Feed Stories 182
  - Sending Challenge Invitations 186
  - Application FriendChooser 191
- 6.2 Using the Facebook Data Store and FQL 191**
  - Facebook Data Store Model 192
  - Data Model for Capital Punishment 193
  - Facebook Data Store Admin Tool 193
  - Service CreateDataStore 196
  - Service SaveScore 198
  - Using FQL with DataStoreAdmin 199
  - Services FBMLGetMyScores and FBMLGetFriendScores 201
  - Service DeleteScore 204
  - Widget SeeScores 205

- 6.3 **Mood Pix—Leveraging Facebook Integration** 208
  - Go To Application 209
  - About Mood Pix 209
  - Widget Home 214
  - Service FeedHandlerService 218
  - Application Info Section 219
  - Mood Pix Application Tab 223
  - Profile Publisher 224
  - Widget SendMoodPix 227
  - Mood Pix Widgets and Services—The Rest of the Story 231
- 6.4 **Facebook Connect—Looking Forward** 231
  - Running the zemblyConnectDemo Widget 232
  - fbConnectDemo2 and fbConnectDemo3 Widgets 234

## *Chapter 7 Working with Dapper* 237

- What You Will Learn 237
- Examples in This Chapter 238
- 7.1 **Getting Content with Dapper** 238
- 7.2 **Photo Search Widget** 239
  - Creating the flickrPhotoSearch Dapp 240
  - Creating a Dapper-Based Service 243
  - Creating a Dapper-Based Widget 244
- 7.3 **London Tube Widget** 248
  - Creating the London Tube Dapp 250
  - Creating Service LondonTubeJourneyPlanner 252
  - Parameter Escape Value 253
  - Creating LondonTubeWidget 254
- 7.4 **MLB Scores Widget** 258
  - Building the mlbupdate Dapp 259
  - Creating Service mlbscores 262
  - Creating mlbScoresWidget 263
- 7.5 **Creating a Feed Reader** 265
  - Building a Feed-Based Dapp 267
  - Building Service GambitsfromGailFeed 268
  - Building GambitsSummaryWidget 268

## ***Chapter 8    Widget Gallery    273***

What You Will Learn    273

Examples in This Chapter    274

### **8.1    LiveWeatherBugWidget    274**

Using E4X to Build LiveWeatherBugService    276

Building LiveWeatherBugWidget    279

Embedding LiveWeatherBugWidget    283

### **8.2    LiveWeatherMapWidget    284**

Modifying LiveWeatherBugService    285

Building LiveWeatherMapWidget    286

Embedding LiveWeatherMapWidget    289

### **8.3    LondonTubeMapWidget    289**

Building LondonTubeMapWidget    291

Adding Geocode Data for Stations    292

Using CSS for the Map Widget    293

Building Mashup LondonTubeMapWidget    294

Embedding LondonTubeMapWidget    298

### **8.4    Yahoo! Pipes    298**

Creating a Pipe    300

Fetch Feed Source    300

Union Operator    301

Filter Operator    302

Sort Operator    303

Saving and Publishing Your Pipe    304

Building Widget zemblyrumblings    304

Doing More with Yahoo! Pipes    307

## ***Chapter 9    Building for the iPhone    309***

What You Will Learn    309

Examples in This Chapter    310

### **9.1    Targeting the iPhone    310**

iPhone Applications    311

A Closer Look at the iPhone    311

The iUI Library    313

- 9.2 iLoanPayment Widget 314**
  - Running iLoanPayment on Your iPhone 315
  - Adding an Icon to Home Screen 317
  - Including the iUI and Prototype Libraries 318
  - Widgets on the iPhone Dashboard 318
  - Building the iLoanPayment Widget 319
- 9.3 iLiveWeather Widget 322**
  - Building the iLiveWeather Widget 324
  - iLiveWeather CSS Code 325
  - iLiveWeather JavaScript Code 327
- 9.4 iCapitalPunishment Widget 331**
  - Building the iCapitalPunishment Widget 333
  - iCapitalPunishment CSS Code 334
  - iCapitalPunishment JavaScript Code 335
- 9.5 Facebook Integration—iPhoneHome Widget 337**
  - Executing a Facebook Application Widget 339
  - Facebook Session Authorization 339
  - Building the iPhoneHome Widget 341
  - Building the iPhoneHome Services 348
- 9.6 iLondonTube Widget 348**
  - iLondonTube Resources 350
  - Building the iLondonTube Widget 351
- 9.7 iCandy—Samples from Apple 356**
  - iLeaves Widget 356
  - iButtons Widget 359
